Professional Profile

I'm a proactive Software Developer interested in learning about new trends in technology and application development.
I consider myself a quick learner, with analytical and creative thinking, capable of finding different solutions to challenging problems. I enjoy researching new techniques and best practices for application and server development.

Relevant Experience

Telecom
Fullstack Software Developer. Oct. 2020 - Present
- Work on high value improvements in a backoffice management system with more than 30,000 users per day.
- Develop and contribute constant improvements and new features in a REST API made with Node.js using Express and Mongoose.
- Improve the response times of the REST API through various optimization
- techniques.
  Work on performance improvements, new modules, and rebranding of a web
- application using React, HTML, CSS, and Sass.
  Contribute to improving the response times of searches in a MongoDB database so that they take up to 10 times less.

Academic Record

Instituto Leonardo Murialdo
Electronics Technician
2016

Universidad Tecnológica Nacional
Electronics engineering
2017 - 2020

Universidad Tecnológica Nacional
Fullstack Development bootcamp
2021

Universidad Abierta Interameric.
Information Systems engineering
2022 - Present

My Personal Projects

MessingApp
Whats-app web clone SPA built with Redux, Sass, Socket-io, Node JS & MongoDB

Postter
